

Getting started with the new UiPath Academy

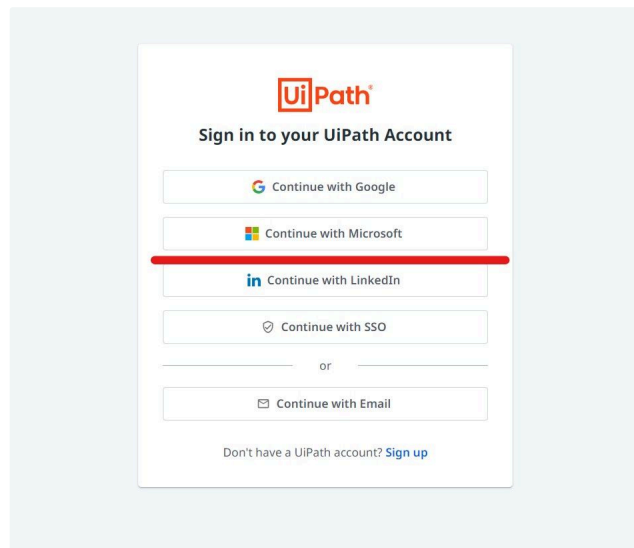

UiPath Academy is now part of Automation Cloud. As such, users who do not have an Automation Cloud account will be prompted to create a **Cloud Organization**. Creating an organization takes a minute and we recommend that the organization name be **your Last Name**.

Here is the step-by-step process:

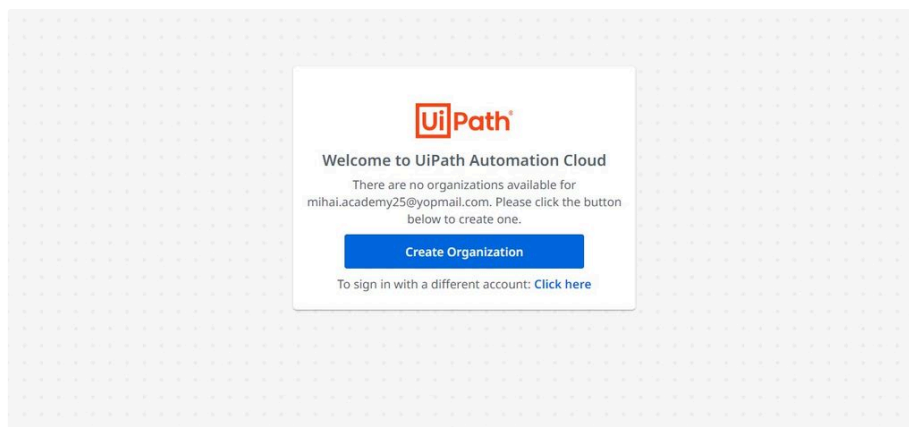

1. Go to <http://academy.uipath.com/internal> and press **LOG IN**.

2. Click on **Continue with Microsoft**.

3. You will be prompted to create a Cloud organization. Click on **Create Organization**.

4. Create a **Display Name**, choose your **Country**, and tick or untick (based on your preferences) the box for “**Send me information about UiPath products, events, and promotions. See Privacy Policy**”.

Tell us a bit about yourself

Display Name *

Field is required

Country/Region *

☐ Send me information about UiPath products, events, and promotions. See [Privacy Policy](#)

6. Once you click on **Create Organization** you will be directed to the **Employee Academy**.

Keep in mind that the Employee Academy home page will have a different design compared to the Public Academy home page from which you initially started.

Next time you will access <http://academy.uipath.com/internal> you will be logged in directly to the Employee Academy.

The screenshot shows the Employee Academy homepage. At the top, there's a navigation bar with the UiPath logo, 'Employees Academy', and links for 'My Academy', 'Onboarding', 'Courses', 'Learning Plans', 'Certifications', and 'Resources'. On the right, there are links for 'Contact us' and a user profile icon. The main header features a large image of four diverse professionals in a meeting, with the text 'The Go-To Platform for Employee Readiness Training'. Below this, there are two boxes: 'Latest courses in Employee Academy' with a 'Browse new courses' button, and 'Security and compliance trainings' with a 'Sign up for data' button. At the bottom, a section titled 'Popular courses and learning plans for employees' lists three items: 'Sales Quarterly Readiness Training', 'Platform Updates - Technical Courses', and 'Introduction to Generative AI'.
